## Océ PlotWave 350 printing system

# Print The Way You Want

### Versatile, fast and reliable large format printing

Get more options to print the way you want, wherever you are with the Océ PlotWave® 350 printing system. Designed to meet the needs of technical professionals on the go. This system is the next wave in versatility, speed and reliability for printing, copying and scanning. It builds on the award-winning success of the Océ PlotWave 300 printer. Enhanced with over 50 new improvements to keep your business moving ahead.

CANON GROUP

---

### Print faster: up to 6 D size plots a minute without long delays

Say goodbye to printing delays. Now you can print up to 6 D-size plots in 1 minute, with virtually no warm-up time. From first click to print in hand – in just 31 seconds. Compared to a slow 4 minutes with conventional printers, this can easily save you an hour a day in printing delays. It also lowers energy consumption significantly due to the energy efficient Océ Radiant Fusing technology.

With the Océ print driver 2.0, you have a fresh, straightforward new user interface that helps you more easily print complex drawings correctly the first time. Simply press print and select the What You See is What You Print preview feature that clearly highlights potential errors that might occur with your selection.

---

### Get more printing flexibility to work efficiently

Get the printing support you need to keep your technical documents moving. If you have access to a WiFi router in your network, you can retrieve your technical files from your cloud using your mobile phone or computer and send a print request to your printer thanks to Océ Mobile WebTools software. Otherwise, you can always print via your network – from wherever you are located. You can get on with your work, while your printer gets on with printing.

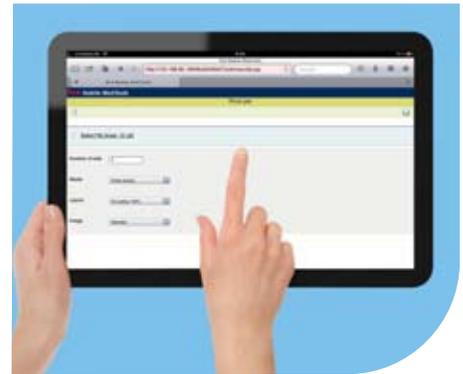

That's just the start. Print and retrieve scanned documents at the system with Océ Mobile WebTools software or a USB flash drive to capture changes and documents on the go. Or print via Océ Publisher Select™ software to produce documents for complex projects.

---

### The reliable way to cut costs and build profits

With new and improved components and a speed increase of 50 percent over the speed of the Océ PlotWave 300 printer, this system provides even better performance.

Operational costs are kept low with the hard working construction. Critical components are completely enclosed to reduce wear and tear. Reinforced materials help extend the system's lifetime and withstand intensive walk-up usage.

## Printing for Professionals

### Creating global leadership in printing

Canon and Océ join forces to create the global leader in the printing industry. For our customers this combines Canon and Océ technology with the support of the Océ direct sales and service organizations. Look to the new Canon-Océ combination for:

- Enterprise printing in the office and corporate printroom
- Large format printing of technical documentation, signage and display graphics
- Production printing for marketing service bureaus and graphic arts
- Business Services for document process outsourcing
