

## COVERAGE & COST PER SQ. FT.

### Sq. Ft. Coverage

**Flooring:** Roughly 45-50 sq. ft. per kit if poured at the recommended thickness of 3/8 in. thick.

Note: This estimate is for a substrate that is flat and even. If you are pouring on a surface that is not completely flat or if you pour thicker than 3/8 in. the sq. ft. coverage will vary.

**Counter-tops:** Roughly 25-30 sq. ft. per kit if poured at the recommended thickness of 1/2 in. thick.

Note: This estimate is for a counter-top that is prepped and poured in the manner and thickness we recommend. Can vary slightly.

### Your Cost Per Sq. Ft.

**Flooring:** Roughly \$4 sq. ft. (includes our actual product and other necessary materials such as mesh, fleece, etc.)

Note: This estimate is for a floor poured 3/8 in. thick and can vary slightly depending on what surface you are pouring on. Price may also go up or down depending on what sands are used.

**Counter-tops:** Roughly \$10 sq. ft. (includes our actual product and other necessary materials such as mesh, foam, OSB, edge forms, etc.)

Note: This estimate is for a counter-top poured at 1/2 in. thick and price may go up or down depending on what sands are used.
