## CORONAVIRUS FOGGING DECONTAMINATION AND DEEP CLEANING SERVICES

Living in the current Coronavirus Pandemic, it is important and crucial to have a safe and trusted hygienic environment for your home and workplace.

Giving reassurance and peace of mind through these uncertain times, **GERMBUSTERS TEAM** is the right team to put your premises into action with a bespoke COVID clean solution. We are specially equipped and certified.

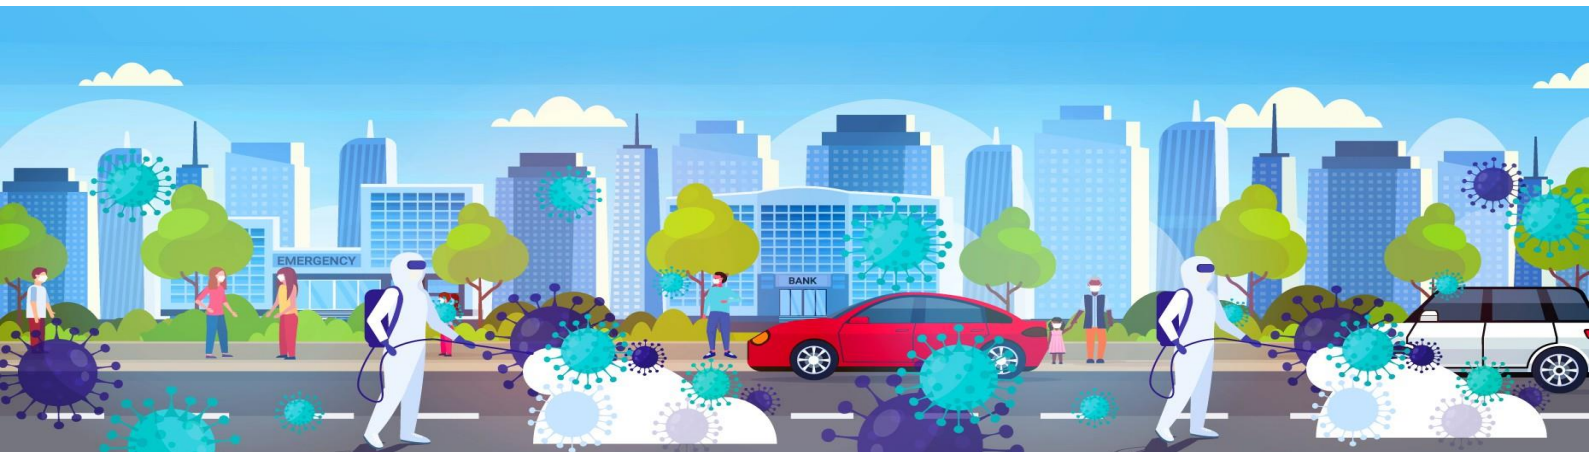

We use Fogging as the ultra-low volume (ULV) method of disinfection. Anti-biocidal fog is distributed throughout the building including your air supply system, reaching every room, and hard to reach areas.

We will spray and chemically clean touchpoints, such as light switches, appliances, door handles, etc.

We execute a COVID-19 Decontamination Cleaning Service any time of the day or night. We are fully trained, insured and provide you with Risk Assessment and Risk Statement.

We work to contain infection across a diverse array of sites including:

- Offices and shared working spaces
- Private Homes
- Hospitals, clinics and care homes
- Schools, colleges, universities and nurseries
- Laboratories and manufacturing facilities
- Shopping Centres and enclosed public spaces
- High street stores
- Cultural Centres, Drama and Cinema Theatres
- Vehicles and transport networks
- Restaurants and Cafes
- Hotels

Our accreditations: Citation, SMAS, QMS ISO 9001.

**Protect Your Home & Business**

with a 99.9% bacteria and germs kill rate

**to keep your space healthy & hygienic!**

Free site survey, bespoke cleaning specification and no obligation quotation!
