BEFORE

Since 2007, locally owned Renewed Kitchens & Countertops has been transforming the city's kitchens, saving homeowners time and money while creating gorgeous spaces you'll want to spend time in.

Instead of gutting a kitchen and starting from scratch, Renewed Kitchens uses the existing cabinetry to remake the look and feel. We recreate your space without the commitment of a complete renovation.

The process begins with a free in-home consultation where we will review your renovation goals and the many colors and door styles available to create the kitchen of your dreams.

It truly is a no hassle renovation, and it can happen in just three to five days.
