BUSINESS OWNERS

For small businesses specifically, SEO & SEM can be powerful tools to increase the traffic to your website. Many agencies and so-called SEO experts will accept your money but do very little to get your business noticed. Whether you plan to manage it yourself or hire a third party, you as the business owner need to understand SEO enough to ask good questions and evaluate results for yourself.

MARKETING PROFESSIONALS

Most modern marketing professionals are expected to have skills in data analytics, writing for SEO, Google advertising, creating optimized web content, link building, competitor analysis, site optimization and keyword research. This program will help you build these skills and more to ensure that you are a valuable commodity for your business.
