Dear Investors!

The FooDriver Team is thrilled to announce the successful completion of our App, marking a significant milestone in our journey. As we shift into the next phase of our project, we intend to develop a smart contract and initiate the tokenization process. This strategic move is designed to enhance the speed and security of your investment returns.

TOKENIZATION AND SMART CONTRACT INTEGRATION

By tokenizing and integrating our App with a Smart Contract, we unlock a distinctive opportunity to list our project on a Crypto Stock Exchange. This opens avenues for rapidly securing additional funds essential for the continued development of our project. The listing not only expedites returns on existing investments but also mitigates the need for future fundraising efforts.

UNIQUE CHARACTERISTICS OF THIS INVESTMENT ROUND

Please be aware that this investment round represents both our inaugural and concluding phase before project listing. The entirety of our App's development has been self-funded. The targeted amount for this round is \$500,000 USD (approximately 680,000 CAD).

FOODRIVER TOKEN CLARIFICATION

It is crucial to acknowledge that the FooDriver token, designated for Smart Contract operations, is scheduled for listing on a stock exchange. The token's value is directly correlated with the influx of users onto the FooDriver platform. As user participation increases, the token appreciates in value. Additionally, users will have the capability to instantly convert FooDriver tokens into their respective local currencies within the application at their discretion.

CREATING AND INTEGRATING SMART CONTRACT

1

Configure and test the smart contract, adapting the dApp to the predetermined geographic jurisdiction.

Cost: \$185,000 USD

Timeframe: 2-3 months

OBTAINING FOODRIVER TOKEN ASSESSMENT

2

Solicit an evaluation from an independent international agency regarding the utility token.

Cost: \$15,000 USD

Timeframe: 1 month

COMMUNITY BUILDING AND ENGAGEMENT

3

Establish and nurture a project community, engaging future users and potential token buyers on crypto stock exchanges via major social networks.

Cost: \$250,000 USD

Timeframe: 4-5 months

Goal: Attain a minimum of 500,000

to 1,000,000 loyal members.

OPINION ON SMART CONTRACT

4

Seek expert validation of the smart contract through an international, third-party agency.

Cost: \$25,000 USD

Timeframe: 1 month

CRYPTOCURRENCY EXCHANGE LISTING PREPARATION

5

Compile necessary documents, including applications, legal documents, and associated legal expenses, and submit an application for listing on a cryptocurrency exchange.

Cost: \$25,000 USD

PHASE 2 PROJECT LAUNCH:

Launch Phase 2 of the project.
