

# STRONGBOND

COATINGS INC.

## WHO WE ARE

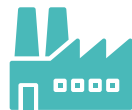

Strong Bond was founded with the vision of providing quality service and value to our customers. Our vision has not changed but the size of our business has. The Strong Bond Team now “covers” Atlantic Canada, serving our commercial, industrial and residential customers from our base in Moncton.

Today, Strong Bond is a respected name in the industry and throughout the entire region, having teamed up with some of the best manufacturers in the industry. We offer a variety of services that include epoxy floor coatings of all types, resinous and seamless industrial coatings, trowel down high-performance coatings, safety lines, parking garages, polished concrete, concrete repair and floor prep.

Strong Bond’s commercial customer list includes food and other manufacturing plants, warehouses, retail stores, condominiums, office and apartment buildings, car dealerships, fire stations, water treatment plants, breweries and restaurants as well as sports facilities, and many more commercial properties across Atlantic Canada.

Water Treatment & Wastewater

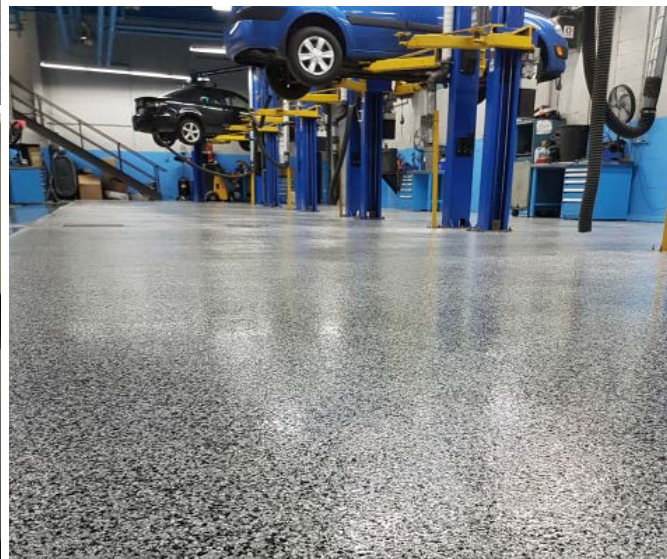

... and many more.

## HERE ARE SOME OF OUR RECENT PROJECTS

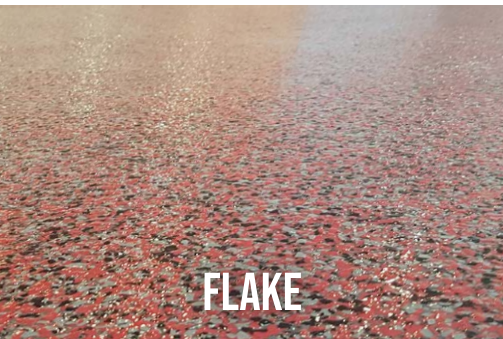

# COATING OPTIONS

Strong Bond is the go-to brand and offers many options for commercial and industrial high performance floor solutions. We are confident we have the right coating solution for your environment and your budget.

Concrete is porous by nature. Moisture, debris and other harmful substances can penetrate the pores in the concrete causing damage to the underlying structural integrity. Unprotected concrete surfaces will attract dirt and inevitably lead to cracks and pitting that will only get worse over time.

We offer some of the strongest and most durable coatings in the industry that will provide you with quality, long term, solutions for your facility's floors.

Team Strong Bond will work with you from start to finish, from consultation or design to installation of your floor by our factory trained employees.

# STRONG BOND SHOP FLOOR

## HEAVY DUTY EPOXY FLOORING

Looking for the most durable and affordable floor option for your industrial or manufacturing facility?

Our Strong Bond (SB) Shop Floor is a slip resistant, solid colour, seamless flooring system consisting of 100% solid epoxy and natural quartz aggregates with a chemical resistant and durable top-coat. "Hard as stone" is often used to describe this popular floor.

Designed for use in heavy duty and heavy traffic mechanical or industrial areas, our SB Shop Floor includes an optional primer/moisture barrier at the concrete level and comes in a single or double broadcast option and then a durable top coat to protect it.

This floor is available in many colours with extras such as safety lines, logos, decals or other in-floor signage options available.

## IDEAL APPLICATIONS:

- Automotive Shops
- Heavy Truck Repair
- Fire Stations
- Water Treatment
- Parking Garages
- Manufacturing
- And More

### ABRASION RESISTANCE

Offering protection from unsightly scratches

### DURABLE

This floor is best described as very rugged; it is known for strength

### DRAIN COMPATIBLE

Can be installed around existing floor drains

### HIGH TRAFFIC

Designed for high traffic areas

### CHEMICAL RESISTANCE

Withstands spills and many chemicals

### WATERPROOFING

Stops water from penetrating the coating

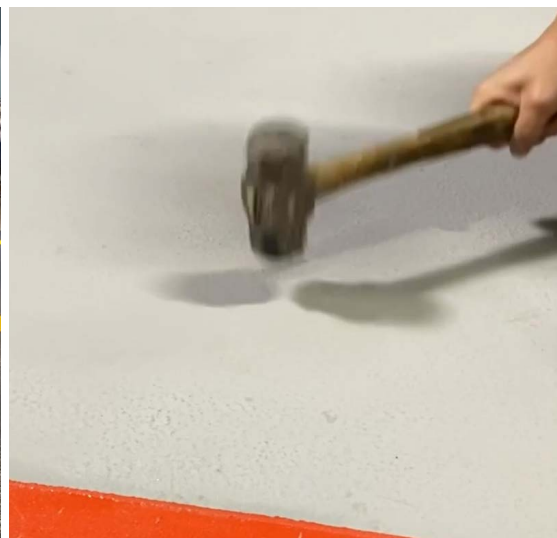

### STRENGTH

Described as being "hard as stone"

### SLIP RESISTANT

Offering good traction

# SEAMLESS FLOOR COATINGS

## ABRASION RESISTANCE

Offering protection from unsightly scratches

## DURABLE

This floor is like adding a new concrete floor on top of your existing floor

## DRAIN COMPATIBLE

Can be installed around existing floor drains

## HIGH TRAFFIC

Designed for extreme traffic areas

## CHEMICAL RESISTANCE

Withstands spills and many chemicals

## WATERPROOFING

Stops water from penetrating the coating

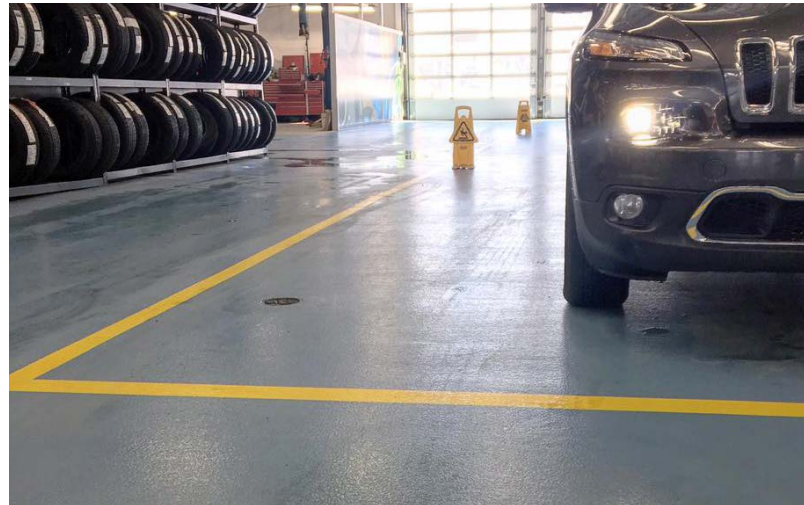

## STRENGTH

This floor is the toughest in the industry

## SLIP RESISTANT

Offering very good traction with a rough surface

# FLAKE

Our SB Flake Floor is very popular in Atlantic Canada. This is an industrial version of our standard SB Flake Floor. We start with preparing the floor surface by grinding and repairing any damage to the concrete.

- ✓ A commercial prime coat is applied to the concrete.
- ✓ The initial coat of commercial epoxy is applied to the floor and the flakes are broadcast to rejection.
- ✓ Once cured, an additional coat of epoxy and flakes are applied.
- ✓ Custom Safety Lines can be added at this stage to be embedded under the top coat.
- ✓ This double broadcast base is then coated with a chemical resistant top coat to seal the floor and provide protection and durability.
- ✓ This floor is considered to be decorative in appearance with many options for colour.

# QUARTZ

This is an industrial version of our standard SB Quartz Floor. We start with preparing the floor surface by grinding and repairing any damage to the concrete.

- ✓ A commercial prime coat is applied to the concrete.
- ✓ The initial coat of commercial epoxy is applied to the floor and the quartz silicate are broadcast into the epoxy.
- ✓ Once cured, an additional coat of epoxy and quartz are applied.
- ✓ Custom Safety Lines can be added at this stage to be embedded under the top coat.
- ✓ This double quartz base is then coated with a chemical resistant top coat to seal the floor and provide protection and durability.
- ✓ This floor is considered to be decorative with the many quartz colour choices yet durable with the strength that the quartz silicate provides.

## ADDITIONAL SERVICES THAT WE OFFER

### JOINT REPAIR

Joints in concrete floors require regular maintenance. We can clean these joints, make new cuts and seal them to prevent damage.

### SPALL REPAIR

Many floors will get spall damage from salt and traffic. We can repair this damage and help prevent further deterioration of your floor.

### CRACK REPAIR

We offer many solutions for crack repair. Cracks left unrepaired will cause more damage down the road and be much more expensive to repair later.

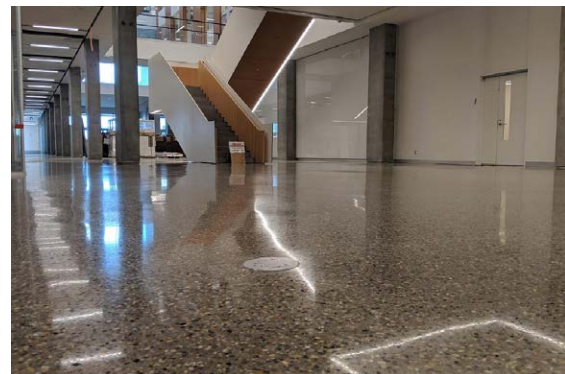

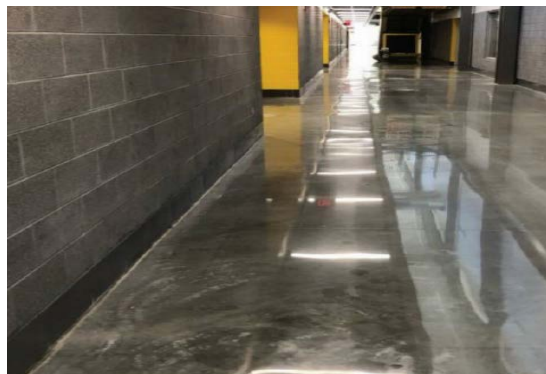

### FLOOR PREP

We can remove mortar or glue left on a concrete floor once you remove the previous flooring. We can also grind your concrete floor and seal it to make it look new or to remove years of dirt and debris.

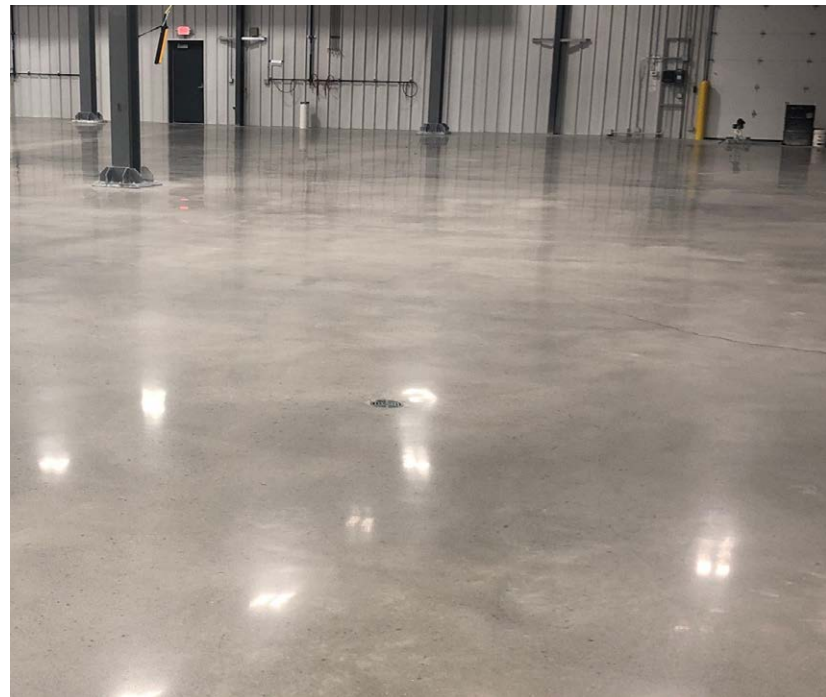

# CONCRETE POLISHING

Strong Bond Concrete Polishing Division offers services throughout Atlantic Canada and can provide you with many options for your concrete floors.

Talk to us about the many benefits of polished concrete and how we can help you.

# WHY POLISH?

Polished Concrete is becoming extremely popular for commercial properties. It offers a long term, low cost and low maintenance, environmentally responsible option for your facility's concrete floors.

Looking for a green way to transform your workspace, be it a warehouse, showroom, restaurant, mechanical shop, auto dealership, or basically any space you can dream of? Look no more. With a Strong Bond polished concrete floor, not only are you doing the environment a favour, but you may also be helping your bottom line.

Easy to clean, no more dust, no more expensive stripping and waxing janitorial costs. The long-term cost of a polished floor will save you money while providing a healthier and environmentally responsible building for customers and employees. You may even see reduced energy costs due to improved light reflectivity.

The options for polishing are virtually endless. We can add colour, logos, signs, patterns and more. Give us a call today to discuss how we can make your polished floor a reality.

## REDUCE DUST

Polished concrete eliminates this dusting, thereby minimizing maintenance costs over unpolished concrete

## DURABLE

Polished concrete surfaces are tightly compacted to reduce the development of stains. At the same time, they do not require any waxing or stripping treatments

## SLIP RESISTANCE

The benefits of mechanically grinding and flattening the floor ultimately increase the coefficient of friction when compared to ordinary concrete

## GOOD FOR ENVIRONMENT

A polished floor requires less chemicals, no VOC's and generally will improve air quality and light reflectivity, creating a healthier workspace for your employees

## A STAIN-RESISTANT SURFACE

By densifying and sealing the surface, polished concrete can transform a porous concrete floor into a tight floor that is dense enough to repel water, oil, and other contaminants, preventing them from penetrating the surface

# DENSIFYING / DUST CONTROL

With Strong Bond Coating's unique densifying system you can rest easy knowing your floor is working for you.

We provide an abrasion resistant, non-dusting, harder concrete surface that will not only reduce the need for expensive re-application of treatments like coatings or sealers, but more importantly, costly downtime.

Our densifier hardens both new and existing concrete slabs and is proven to provide long-term performance at lower costs than traditional treatments, keeping money in your pocket.

# STAINING / DYEING

Concrete staining or dyeing has become very popular as a permanent, environmentally friendly, solution for concrete floors in office buildings, schools, government and healthcare facilities. Strong Bond has an infinite number of options available for you.

With our advanced colouring system we can customize and style any floor you desire. With a full selection of dyes and stains, our team can help add personality to your space.

# WAREHOUSE MARKINGS

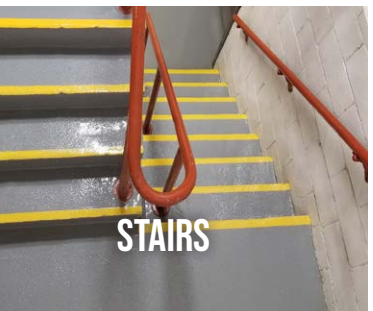

## WE OFFER A VARIETY OF OPTIONS TO MEET YOUR NEEDS

Strong Bond is well known for our industry leading floor coatings including all types of warehouse markings. The health and safety of your staff and customers cannot be overlooked; Strong Bond can help you make sure your facility is well protected.

Understanding that budgets and business changes can influence the decision on floor markings, Strong Bond will work with you to meet your needs and your budget.

Strong Bond Coatings can help transform your work space into a functional and safe environment for staff, visitors, and safety compliance guidelines.

Our systems provide high visibility and abrasion resistant markings that are easy to clean and identify, even in high traffic areas. Our safety lines are guaranteed to outlast and outperform traditional paint or safety tape.

# LINE STRIPING

## YOUR PARKING LOT IS A WELCOME MAT

Your parking lot can say a lot about your business and is often the first impression for a customer.

Let us help to ensure that the first impression is a great impression!

Strong Bond Striping Division can help you ensure your parking and access areas are pristine and bright with industry leading products and technology. We use laser guided striping equipment to make straight, crisp lines, using traffic paint designed to withstand our local climate.

In an industry that is known for poor quality work with watered down products, you can have confidence that Strong

Bond will provide you with the absolute best service in the industry.

A properly maintained parking lot will not only make your business look more professional and prosperous but will last longer and cost less in the long term.

**Trust Strong Bond for your parking lot striping.**
