

# LDA - LOW DOSE ALLERGEN

LDA works to restore your natural active immune tolerance to antigens or allergens that increase T-cells and B-cells that shut off the allergic or immune response.

LDA is administered using tiny intradermal injections of extremely low dose broad based mixtures of allergens on the skin of the forearm.

On average, clients receive 1-2 injections at two month intervals for the first year. As clients progress, intervals gradually extend to every 3 months, and some clients can even stop treatments! Most clients experience significant improvement within the first three doses!

LDA Therapy is used for treating:

- Food Allergies
- Environmental Allergies
- Autoimmune Conditions
- Skin Conditions
- Gut Conditions
- Endometriosis
- Asthma
- PANDAS
- Autism
- and More!!

## SKIN RASH CALMED!!

*The rash calmed down almost immediately. There is still some itching, but the skin is losing the angry red/pinkish color and returning to my lilly white untanned skin. I so appreciate the time you spent with me, patiently finding what weakened me, and then treating me as well. You were a joy and a blessing to meet! I thank the Lord for you, and for what you are doing to help people.-- Carol C.*

## NOTICEABLE DIFFERENCE!!

*I would definitely say that I have felt hydrated, and have had no headaches or brain fog since our session. Additionally, I have a bit more energy than usual and am feeling less lethargic. Thank you so much for all of your help! -- Josiah L.*

## CHANGED LIVES

# ALLERGY RELIEF TREATMENTS

Real Health  
MEDICAL

# -AAET - ADVANCED ALLERGY ELIMINATION TECHNIQUE

Using AAET and laser desensitization is like a needle free acupuncture treatment to retrain your body's nervous and immune systems to not overreact to potential allergens.

By tapping (literally) into the structural, metabolic, and emotional aspects of energy pathways that can signal the allergic reactions to turn those off completely -- AAET is an energy frequency based assessment and treatment that takes approximately 24 hours to cycle through for relief.

Typically clients will book three sessions:  
Assessment & Treatment  
Treatment Follow up #1  
Treatment Follow up #2

## AAET Assessment & Treatments:

- Food sensitivities
- Food intolerances
- Food allergies
- Environmental allergies
- Hormone imbalances
- Hydration
- Autoimmune triggers
- Emotional triggers
- And More!
