

Hey Alejandro,

Sometimes a picture really is worth a thousand words.

This patient came to me with severe psoriasis and lymphedema. Just 8 weeks later, the transformation speaks for itself. No steroids. No immunosuppressants. Just strategic treatments that gets to the root cause.

[I still have a few appointments](#) available before the holidays - both in my Manhattan office and via telemedicine for patients worldwide.

Ready to tackle your health challenges? Don't wait for the New Year rush.

Stay healthy,

A handwritten signature in black ink that reads "Dr. Lorella". The signature is fluid and cursive, with a long horizontal stroke at the end.

PS: These results aren't unusual for my patients - they're expected when we address the root cause instead of just treating symptoms.
