TechAdvantage Nigeria:
Where Apprenticeship meets Technology

The Nigerian Apprenticeship system is renowned for grooming and empowering young entrepreneurs through hands-on training, thus transfering practical knowledge and core business skills.

Computer Villages in Nigeria have adopted this system thus creating a self sustaining system that generates economic activity across all ages.

The apprenticeship program is designed by a fusion of the features of the Apprenticeship system with the delivery methods of best in class online learning programs thus having the potential for maximum impact.

Target Audience

This program seeks to provide the support for young and motivated individuals who:

- Have an interest in growing and scaling their computer village business.

- Are eager to learn and grow as entrepreneurs.

Program Structure

This apprenticeship program equips participants with the knowledge and skills to launch and run a successful tech business in any part of the country.
