Dear Members of the Gem County Board of Commissioners,

I am writing to express my support for the Merrill's Pit – Mineral Extraction SUP proposed by Granite Companies, LLC.

Access to locally produced construction materials is fundamental to economic development and long-term infrastructure planning. Projects like Merrill's Pit help ensure that public works, emergency repairs, and private development can proceed efficiently and responsibly.

This proposal reflects thoughtful land use and practical planning. I respectfully encourage the Board to approve this Special Use Permit.

Respectfully submitted,
