Dear Members of the Board,

I am writing to express my support for the Merrill's Pit – Mineral Extraction SUP submitted by Granite Companies, LLC.

Local access to aggregate materials is essential for maintaining and improving public infrastructure, including roads, bridges, and utilities. When materials must be hauled from long distances, project costs increase and additional strain is placed on county roadways.

Merrill's Pit provides a practical, local solution that supports efficient infrastructure maintenance while reducing unnecessary hauling impacts. I respectfully encourage approval of this application.

Sincerely,

(Signature)
