Dear Members of the Board,

I am writing to express my support for the Merrill's Pit – Mineral Extraction SUP from the perspective of a local employee in the excavation and construction industry.

Projects such as Merrill's Pit provide stable, well-paying jobs and long-term employment opportunities for individuals who live and work in Gem County. In addition to direct employment, they support trucking, equipment maintenance, and other local trades.

Granite Companies, LLC's proposal represents an investment in local workers and the economic stability of our community. I respectfully request your approval of this application.

Sincerely,

(Signature)
