Dear Members of the Gem County Board of Commissioners,

I am writing in support of the Merrill's Pit – Mineral Extraction SUP submitted by Granite Companies, LLC.

Responsible mineral extraction plays an important role in long-term community planning. Local access to construction materials allows counties to grow thoughtfully, maintain infrastructure, and manage costs without relying on distant sources.

This application represents practical planning and a commitment to meeting local needs locally. I encourage the Board to approve this request.

Respectfully submitted,
