**CONFIDENTIAL**

To Whom It May Concern:

Re: Charlene Dobson  
D.O.B: January 25, 1993

I have been treating Charlene since December 2009 for Severe Anxiety Disorder. Due to the severe anxiety symptoms she was unable to attend school and she missed a lot of school. With adequate treatment her symptoms have improved a great deal and she started attending school regularly over the last few months. However, due to the fact that she missed a lot of school she would benefit from additional educational opportunities such as summer school and I would support her attempts to obtain education via summer school.

Sincerely,

Senthil Damodharan, MBBS, DPM, MD, MRCPsych (UK), CCST, FRCP(C)  
Child and Adolescent Psychiatrist  
Child and Youth Mental Health
