**LEGACY FOUNTAIN**

# OFFSET VALVE

The offset valve fountain provides more options in your pens or buildings for placement. Our standard foot prints provide an easy solution to swap out existing fountains without having to pour new concrete pads.

**LF-S1851**

**Capacity: 20 Gal**

Width - 24"
Length - 51"
Drinking Height - 18"
Herd Capacity
200 Beef - 100 Dairy

**LF-S1830**

**Capacity: 10 Gal**

Width - 22"
Length - 30"
Drinking Height - 18"
Herd Capacity
100 Horses - 100 Beef 50 Dairy

# READY-TO-INSTALL DESIGN

The Legacy Fountains come with the following components installed from the factory for a fast install in the field.

- Heating Element(s)
- Float & Valve Assembly
- Supply Line Heat Tape
- Adjustable Thermostat
- Lift Assist Gas-Struts
- Weather-Stripping

Simply install and connect the below included components:

- Supply line extension hose with one brass fitting and hose clamps
- Connect power source to our pre-wired box.

Mount it to your concrete pad with your stainless steel anchor-bolts and you're ready for operation.

The Legacy Fountain line is engineered for producers who demand durability, easy access service, and reliable year-round performance.

- Flip-up trough design for easy maintenance
- Clear access to all components
- Rodent & Insect resistant foam insulation
- 9.5+ R-Value
- 3/4" valve with float
- Universal replacement parts
- Adjustable thermostat for cold-weather efficiency
- Heavy-duty stainless-steel construction
- Smooth, rounded edges for livestock safety
