

At Advanced Pediatrics we are dedicated to providing high-quality care to support your health and well being. Our goal is to ensure you receive necessary preventive care while addressing any medical concerns.

Understanding Your Preventive Care Visit

Most insurance plans cover an annual preventive care visit at no cost to you. To be sure please check with your insurance company per your benefit plan.

Preventive care includes:

- Review of medical and family history
- Screening for common health conditions (based on age and risk factors)
- Routine Vaccinations
- Basic Test (e.g. Cholesterol, blood sugar)
- Health counseling (nutrition, exercise, etc.)

Services That May Not Be Covered as Preventative Care:

Some services fall outside of preventive care and may be considered diagnostic. These services may apply to your deductible, copay or co-insurance.

Diagnostic services include:

- Evaluation of new or ongoing symptoms (e.g. headaches, fatigue, joint pain)
- Additional Lab tests / Developmental Screenings
- Procedures (e.g., warts destruction, earwax removal, etc.)
- Travel vaccines or genetic testing unless specifically covered by your plan

Patient Acknowledgement

I acknowledge that I have read and understand the difference between preventative and non preventative services. I understand that my insurance may not cover all services provided during the visit and that these may apply to my deductible. I accept responsibility for any cost not covered by my insurance.
